Steel Lighting Co Assembly and Installation

STEP 1:

Ensure the **Orange Gasket** is firmly set into the wedge on the bottom of the **Covernut**.

Unravel the wires from the **Socket** and pull them through the inside of the **Lighting Shade**.

Slide the **Covernut** over the wires and **REVERSE THREAD** the **Covernut** onto the top of the **Socket**.

The Socket should be secure in the Lighting Shade and the wires should be coming out of the top.

STEP 2:

Thread the **Arm** into the round **Mounting Plate**. Then feed the wires from the **Lighting Shade** through the **Arm** and out through the **Mounting Plate**.

Thread the Arm and the Lighting Shade to complete Assembly!

Installation of Lighting Fixture

This lighting fixture includes a 4" round **Mounting Plate**. We recommend a **4" Round Electrical Box** to match our **Mounting Plate**. If our **Mounting Plate** does not fit, please consult your electrician for alternative mounting options for 1/2" threaded rigid pipe.

Use the **Black Gasket** between the back of the **Mounting Plate** and your **4" Round Electrical Box**. Make wire connection and complete installation by using the (4) included screws.

Take a photo of the installed lighting fixture and tag us @steellightingco on Instagram for a Free LED bulb!

Hello!

Thank you so much for your **Steel Lighting Co.** purchase! We have been proudly creating these fixtures for over 20 years in Los Angeles, California. As a family owned and operated business, we take a huge amount of pride in our work and we hope that you see that in the products that you have received.

If for any reason you are unhappy with your order, or you have questions about ordering more, we are just a phone call away! Just mention this note and receive 10% off all your future orders.

Thank you from sunny California!
